## DETAILED ACTION

### *Election/Restriction*

1. Applicant's election of invention I without traverse of the restriction requirement in Paper No. 8 is acknowledged and made final.

### *Drawings*

2. The drawings are acceptable.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-3, 5-6, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Higham et al. '653 which discloses:

(Re: cl 1, 6) A method, comprising: entering user information into a processor controlling a dispensing cabinet (c16 L 54-64); said processor unlocking certain doors of the dispensing cabinet in response to said user information; choosing a locate mode (fig 10A); identifying an item to be located (fig 10D 4<sup>th</sup> box; col. 21 L 46-59); flashing a display positioned on a shelf within the cabinet with the number of items held by that shelf which are to be located; logging off; and locking the unlocked doors (abstract; c14 L 30-35)

(Re: cl 2,6) entering patient information. (Fig 18a second box)

(Re: cl 3) the steps of opening one of the unlocked doors, selecting a

compartment, entering the number of items taken, and closing the opened door (fig 18a;abstract).  
(Re: cl 5, 8). identifying an item to be located includes one of picking an item from a pick list, inputting identifying information with a keypad, and barcode scanning. (C28 L 7-33).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-7, 10-13, and 40-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yarin et al. '999 in view of Gilmore, with Yarin et al. '999 disclosing the elements previously discussed and further suggests:

(Re: cl 4,7) a locate mode includes choosing from among a dispense, locate, return and restock mode (fig 12; c 9 L 20-43).

It would have been obvious at the time of the invention for Higham et al. '653 to have a locate mode menu so that a multi mode authorized user may select the desired dispenser operation mode as taught by Blechl et al. and come up with the instant invention.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
